Turn off push notifications to control your data usage as well as preserve your battery life. Push notifications allow your phone to constantly be in touch with email servers and the internet in order to be notified immediately when something happens. Deactivating this will mean that you have to check your email, websites or other applications for new messages and alerts, but it will be dramatic in how it affects the functionality and performance of your phone.

If you have locked yourself out of your phone, you should look online for ways to fix it. Many people have had this happen to them as well, so there are videos and other tutorials on how to unlock an iPhone online. Just be aware that this is a last resort, as it will likely delete all of your information when you reset it.

If you use your iPhone as a listening device for your favorite mp3s, use this trick. To randomly shuffle to another song, simply shake the phone gently with a flick of your wrist. This is perfect for those who prefer to listen but don't want to stop and take the time to select another song.

When typing a URL in your iPhone's Safari browser, you can hold down the ".com" button at the bottom of the keyboard to bring up a list that contains other domain suffixes. To choose one, just glide your finger over them and release when the appropriate suffix is highlighted.

When texting on your iPhone, you can speed up the process by learning the shortcut for periods. Rather than clicking on the "123" button to bring up the punctuation screen, you can double tap on the space bar. This will automatically insert a period and a space in your message.

A terrific way to get even greater use out of your iPhone is to take advantage of its photographic shooting and editing capabilities. By customizing the camera interface and utilizing one or more of the professional-quality editing applications available, you may find that you no longer need to carry a conventional digital camera.

It is easy to save an image from Safari on your iPhone. When you are on the image you want, tap and hold down on the image. A message will come up, asking you if you want to "Cancel" or "Save Image". Obviously, you will want to pick the "Save Image" option.

Learn how to scroll fast to the top of your big music libraries. If you've got a ton of music on your iPhone, getting from the bottom to the top of it can be a lot of thumb swipes. Or you can simply click the clock at the top of your iPhone. This automatically brings you back to the top of your music.

Choose a distinct ringtone. Surely you would like to stand apart from those who use stock ringtones. Upload one of your favorite songs or maybe a sound byte that you really like. That will help get people's attention.

Take advantage of location based reminders. One of the features of the new iPhone 4s is the ability to give you reminders of what you ask when you get to certain places. If there is something you do not need or want to remember until you get home at night, ask Siri to remind you about it as you leave from that place in the morning.

Avoid exposing your iPhone to temperature extremes. You definitely do not want to take your iPhone into cold refrigerated areas like they have in some warehouses and then back out into the warmth. Exposing your iPhone to extreme cold can cause water to materialize inside of it.

Save photos you like easily in Safari. If you see an image you want to keep, just press and hold on the photo on the website page. Your iPhone will give you the option of saving a copy of the image. This save is offline so you can use it for personal use through email or anything else.

Purchasing an iPhone case could potentially save your phone. Your iPhone glass will easily shatter if you drop it without some sort of case protection on. Having a case will help protect your iPhone from harm, and will ensure you get the most out of your purchase.

There is no denying the fact that the iPhone revolutionized the world of handheld devices. The seemingly limitless tasks that can be accomplished with the iPhone can make owning feel a bit daunting to some. However, if you heed the guidance contained in the piece above, you will be an expert in short order.
